# KENNEDYWANAKACHA

# **FULL STACK DEVELOPER**

#### **PROFILE**

Innovative web developer skilled in full-stack development with expertise in Next.js, Node.js, and MongoDB. Experienced in building e-commerce platforms, real-time IoT monitoring apps, and secure authentication systems. Proficient in UI/UX design, performance optimization, and scalable cloud deployment. Passionate about integrating AI and modern technologies to deliver impactful, user-friendly solutions across diverse projects.

## WORK EXPERIENCE

#### **Personal Project**

2024 - PRESENT

Silk Road Blog App

- Developing a dynamic blog platform using Node JS, allowing users to create, edit, and delete posts.
- Implemented a rich-text editor for content creation.
- Set up a MySQL database for efficient data storage and retrieval.
- Outcome: Gained experience in back-end development and database management.

#### Personal Project

2024 - PRESENT

Dangoo Enterprise

- Created a fully functional e-commerce platform using Next Js for the front end and Node.js with Express for the back end.
- Integrated MongoDB for product and user data management.
- Implemented user authentication using Json Web Token (JWT).
- Developed a shopping cart feature with real-time updates.
- Outcome: Enhanced understanding of full-stack development and RESTful API integration.

#### Intern

2024 - 2025

Betta Softwares Africa

- Analyzed problems and worked with teams to develop solutions.
- · Sorted and organized files, spreadsheets, and reports.
- · Prepared project presentations and reports to assist senior staff.
